

PM-400 Breathable Floor Coating

PolyMax

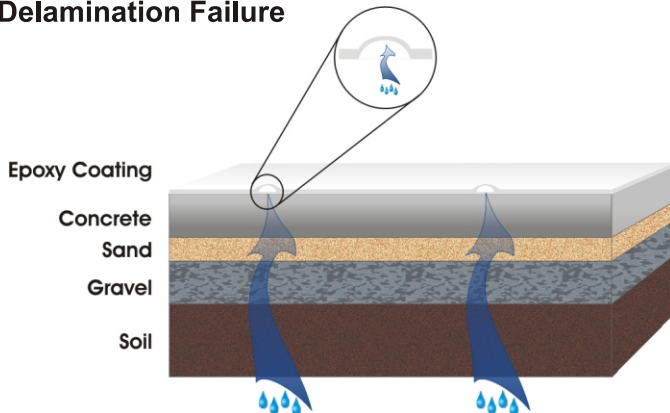

Maximum Performance Polymer Flooring

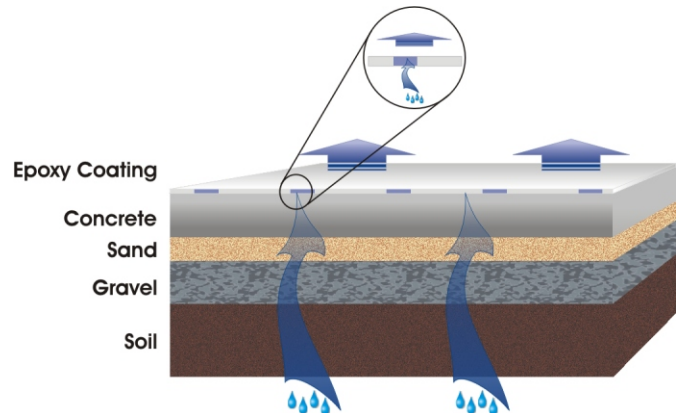

- 2-part waterborne epoxy coating contains no latex
- Suitable for moisture vapor emissions of 10 lbs.
- Exceptional bond to dry or damp concrete
- Superior chemical and solvent resistance
- Optional decorative flakes
- Easy to clean
- Low VOC
- Light reflective gloss finish

Most coatings trap water vapor that migrates through concrete causing blisters and peeling.

Traditional Delamination Failure

PM400's chemistry enables the epoxy coating to "breathe", allowing moisture to pass through rather than becoming trapped. No More Blistering and Peeling!
